Duplicate test names in the Investigation list

Muqsit Health System · Investigation report findings catalog (client/src/data/investigations.ts) · 926 tests in 28 categories · checked 15/10/2026. Nothing in the app was changed.

1. Exactly the same name, in more than one place (2)

#	Test name	Where it appears (category #position)
1	**Beta-HCG**	Beta-HCG — Tumor Markers #6 Beta-HCG — Reproductive #5
2	**ECG**	ECG — Imaging #6 ECG — ECG / Drug #1

2. The same name written differently — spaces, dots, dashes, brackets (5)

#	Names	Where it appears (category #position)
1	**Hb Electrophoresis** **Hb. Electrophoresis**	Hb Electrophoresis — Hematology #18 Hb. Electrophoresis — Haematology #20
2	**VDRL / RPR** **VDRL (RPR)**	VDRL / RPR — Infectious #14 VDRL (RPR) — Microbiology #55
3	**CA 19-9** **CA-19.9**	CA 19-9 — Tumor Markers #3 CA-19.9 — Biochemistry #61
4	**CA 15-3** **CA-15.3**	CA 15-3 — Tumor Markers #7 CA-15.3 — Biochemistry #23
5	**CA 72-4** **CA 72.4**	CA 72-4 — Tumor Markers #9 CA 72.4 — Biochemistry #67

3. Probably the same test — the names differ only by “S.” / “Serum” (19)

“S.” stands for serum. These look like the same test listed twice, once from each catalog — please confirm each one before anything is merged.

#	Names	Where it appears (category #position)
1	**LDH** **S. LDH**	LDH — Hematology #11 S. LDH — Biochemistry #40
2	**TIBC** **S. TIBC**	TIBC — Hematology #13 S. TIBC — Biochemistry #41
3	**Bilirubin Total** **S. Bilirubin (Total)**	Bilirubin Total — LFT / Liver #4 S. Bilirubin (Total) — Clinical Pathology #4
4	**A/G Ratio** **S. AG Ratio**	A/G Ratio — LFT / Liver #9 S. AG Ratio — Clinical Pathology #20
5	**BUN** **S. BUN**	BUN — RFT / Renal #3 S. BUN — Clinical Pathology #21
6	**Myoglobin** **S. Myoglobin**	Myoglobin — Cardiology #10 S. Myoglobin — Clinical Pathology #30

#	Names	Where it appears (category #position)
7	**Lipoprotein(a)** **S. Lipoprotein (A)**	Lipoprotein(a) — Cardiology #13 S. Lipoprotein (A) — Clinical Pathology #24
8	**Anti-CCP** **S. Anti-CCP**	Anti-CCP — Rheumatology #2 S. Anti-CCP — Microbiology #28
9	**Uric acid** **S. Uric Acid**	Uric acid — Rheumatology #4 S. Uric Acid — Clinical Pathology #22
10	**TSH** **S. TSH**	TSH — Endocrinology #1 S. TSH — Biochemistry #42
11	**FT3** **S.FT3**	FT3 — Endocrinology #2 S.FT3 — Biochemistry #46
12	**FT4** **S.FT4**	FT4 — Endocrinology #3 S.FT4 — Biochemistry #47
13	**PTH** **S.PTH**	PTH — Endocrinology #10 S.PTH — Biochemistry #48
14	**Prolactin** **S. Prolactin**	Prolactin — Endocrinology #11 S. Prolactin — Biochemistry #64
15	**CEA** **S. CEA**	CEA — Tumor Markers #2 S. CEA — Biochemistry #37
16	**Beta-HCG** **S. BETA hCG**	Beta-HCG — Tumor Markers #6 Beta-HCG — Reproductive #5 S. BETA hCG — Biochemistry #56
17	**Beta-2 Microglobulin** **S.Beta 2 Microglobulin**	Beta-2 Microglobulin — Tumor Markers #10 S.Beta 2 Microglobulin — Biochemistry #44
18	**FSH** **S. FSH**	FSH — Reproductive #1 S. FSH — Biochemistry #53
19	**LH** **S. LH**	LH — Reproductive #2 S. LH — Biochemistry #52

4. Look alike, but are NOT duplicates (2)

These differ only in a capital letter, and the capital is the meaning: **C and c**, **E and e** are different Rh antigens. Keep both.

#	Names	Where it appears (category #position)
1	**Rhesus C Factor** **Rhesus c Factor**	Rhesus C Factor — Transfusion Medicine #4 Rhesus c Factor — Transfusion Medicine #5
2	**Rhesus E Factor** **Rhesus e Factor**	Rhesus E Factor — Transfusion Medicine #6 Rhesus e Factor — Transfusion Medicine #7

5. Categories

Favourite · Hematology · LFT / Liver · RFT / Renal · Cardiology · Infectious · Autoimmune · Rheumatology · Endocrinology · Tumor Markers · Imaging · Special Scores · Neurology · Ophthalmology · Dermatology · Reproductive · Genetic · Biochemistry · Clinical Pathology · Haematology · Microbiology · Pathology · Virology · CT Scan · X-Ray · Ultrasonography · Transfusion Medicine · ECG / Drug

Most duplicates above are one test listed twice: once in the app's own categories (Hematology, LFT / Liver, Endocrinology, Tumor Markers…, with separate boxes and units for each value) and once in the imported NILMRC lab list — **Biochemistry, Clinical Pathology, Haematology, Microbiology** — which has the names only, with one free-text result box each. “Hematology” and “Haematology” are therefore two separate categories.

How this was checked: every test name in every category was compared (1) exactly, (2) ignoring capitals, spaces and punctuation, and (3) also ignoring a leading “S.” / “Serum”. Names that mean the same but are worded differently in other ways (an abbreviation against a full name) are not caught by this and are not listed.
